

Gynecologic Cancer InterGroup Cervix Cancer Research Network

Participant name: Dolores Gallardo

- 550,000 new cases CC in the world, 85% incidence and mortality are seen in less developed countries. Asia has half of the cases; 15% in Latin America.
- **Mexico** has a population of 126 millions. We have Public Social Security(PSS): INCan and 34 State Cancer Centers; IMSS and ISSSTE are the biggest Institutions.
- 15,000 CC new cases, peak age is 50-54 yo. all the groups of age are affected since 25 y; 15% cases are in early disease.
- 62 lineal acelerators, half of them are in the PSS coverage.
- We began a vaccination campaign in 2008 in girls 9-16 yo, and since 2013 expanded to universal coverage in girls 9-12 yo. We expect to have results in two decades.
- This meeting is a big oportunity for the improvement of clinical practice in our region and to promote clinical trials.

Cervix Cancer Education Symposium, January 2017, Mexico
