

Stats Committee Report to General Assembly

Chair: A. Reuss, Co-Chair: X. Paoletti

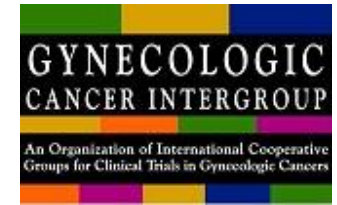

Mission and Goals

- The mission of the Statisticians Committee within the GCIIG is to further the exchange of knowledge about methodological/statistical/design aspects of gynecologic cancer trials and the harmonization of these aspects.
- Thus, it aims to improve the quality of evidence from gynecologic cancer trials through using optimal statistical methodology.
- The Stats Committee liaises with other GCIIG committees to participate in the discussion of new trials or projects.

Stats Committee Report to General Assembly

Chair: A. Reuss, Co-Chair: X. Paoletti

Future Topics

- irRECIST / iRECIST
- Identification and standardization of key variables
- Tackling non-proportional hazards
- Adjustment for multiplicity and subgroup analyses
- Accounting for non-eligible and non-adherent randomized patients
- Analysis and design of non-inferiority trials
- Data maturity and timeliness of analysis
- Methods for determining cutpoints to split continuous variables
