Mega database

- Big challenge
- Need to identify which group(s) will take a leading role for coordination
- How to start?
 - Each Tumor/working group should come up with a few very important questions that are worthwhile the time and effort with key variables needed for answering the questions
 - Review the clinical trials available so that we can select trials containing information
 - build logistic process to pursue
 - need funding

2 other topics

- PFS as primary endpoint in Ovarian Cancer trials (primary and recurrent) – Presentation by Mark Brady – discussion
- Recommendations for PFS assessment – Draft document by AR - discussion
