| I. | What is the GCIG? History of GCIG GCIG mission is "collaborative international intergroup trials" GCIG international initiatives | Small | 15 |
| II. | Importance of International Collaboration efforts in Translational research, symptom benefit, rare tumors, megadatabase development, education and mentoring, including mentoring other international intergroups, e.g., new LUNG "TACT" | Poveda | 15 |
| III. | Key Successes—Prospective Trials | Pujade-Lauraine | 15 |
| IV. | Key Successes—Consensus Conferences & Cervical Cancer Research Network | Berek | 10 |

- **GCIG Content in other Group Meetings & Junior Investigator Targeted Programs**

The committee discussed the development of educational programs to present methodology of international clinical trials, primarily targeting junior and new investigators in regions and countries where programs and groups are still being developed. Several possible venues were suggested including liaising with CCRN and its initiatives in developing countries. It was felt that industry and pharma support should be solicited to underwrite these symposia. It was agreed that Jahid Sehoili will take the lead and investigate the options, locations and financial support and bring them back to the working group prior to the next group meeting.

- **Roster of Affiliates & Advocacy Groups**

Katherine Bennett assembled materials and brochures from several organizations that can be used as reference for our development of educational programs. Christian Marth shared the ESGO materials, which can be used as a template for how we might apply them.

2. Caregivers & Survivors Programs

This item was deferred.

3. Finances

An effort will be made to solicit funding from pharma and industry to support our educational programs and symposia. Jahid Sehouli will investigate and report back to the working group.

4. Co-Chair Selection

Jahid Sehouli offered to serve as Co-chair of our working group and his offer was unanimously accepted.
