

CENTEast (Central Asia and East Europe Trial Group)

- An increasing number of valuable studies on the field of gynecological cancer has been presented in the literature in recent years in these regions.
- However, even we are representing a total population of around 400 million and our ethnic groups are still underrepresented in all current trials.
- Approximately 40,000 women develop cervical cancer and 20,000 die from the disease yearly in this region.
- Consequently, in several Central Asia and East Europe countries, at least one woman in 50 will develop cervical cancer before the age of 75 years

Based on the burden of cervical cancer in these regions and with the aim of conducting translational and clinical researches in all gynecological fields, we have planned to found a new research network.

CENT-EAST FOUNDERS

YOUNG BRAINSTORMERS

CENT-EAST TRIAL PROCESS: Link Between Our YOUNGS and SENIORS for TRIALS

- Young Brainstormers
 - Usually have no data
 - Usually retrospective
 - Usually have no net-work

- CENT-East Senior Funders
 - Good clinical practice
 - Good patient data
 - No collaboration
 - No time

- Data Collected for the Accepted Trials

CENT-EAST is the LINK
BETWEEN OUR YOUNGS
and SENIORS for
REGIONAL TRIALS

CENT-EAST FOUNDATION

- February 2018
- Invited by GCIG
- Collaboration with CEEGOG
- First Launch on Publication at IJGC
- First Trials are Under Review for Endometrial Cancers

- Contact: info@centeast.com
