GCIG

MISSION and VISION STATEMENT

- **MISSION:** to promote and facilitate high quality clinical trials in order to improve outcomes for women with gynecological cancer.
- **VISION:** Improving quality and duration of life for women with gynecologic cancers will be accomplished through a
 - focused common purpose,
 - shared expertise
 - mutual respect among members
 - with recognition and accommodation of cultural, geographic, and clinical diversities amongst and between members and patients.

GCIG

Current situation and Challenges

- One of the keys to improve outcomes for women with gynecological cancer is to expand research in gynecologic cancer.
 - Increasing the amount of cooperative group performing clinical trials in a global network as GCIG.
- It is therefore essential to boost teamwork in countries without methodological tradition of cooperative groups and to teach them how to achieve this.

Current situation and Challenges

- Some countries have shown interest in developing cooperative groups BUT need advice .
 - COLOMBIA
 - SINGAPORE
 - CUBA
 - TUNISIA
 - COSTA RICA
 - PANAMA
 - MALAYSIA
 - ARGENTINA
 - VIETNAM
 - CHILE
 - PERU
 - BRAZIL (SP, MG,...)
 - RUSSIA

GCIG

Current situation and Challenges

- Any international or national research cooperative group performing clinical trials in gynecologic cancer may become a member group of the GCIG.

 - Develop an important **communication** tool for GCIG (nothing have been done so far)
